IFIC GOUDÉ

RESEARCH SCIENTIST IN COMPUTER GRAPHICS

Visual saliency of 3D environments. Style transfer. Real-time rendering. Point clouds. High Dynamic Range (HDR). Tone Mapping Operator (TMO). Color Appearance Model (CAM).

PROFESSIONAL EXPERIENCE

R&D scientist | Univ. Rennes 1 | 2022 (7 months)

Develop a saliency-driven real-time gaze behavior model for virtual characters.
Integrated in Unreal Engine 5
(*C++ / Metahumans*). SIGGRAPH submission.

PhD student | IRISA – Univ. Rennes 1 | 2021 (3 years)

Rendering of HDR 3D point clouds

Style transfer between 3D point clouds (CGF journal).
Tone Mapping Operator for 3D scenes (C&G journal). Tone Mapping Operator adapted to Head Mounted Displays (CGI conference, TCS journal).

R&D engineer | IRT b<>com |2018 (15 months)

Integrate and develop a VR demonstrator with Unity3D. Scripts (*C#*) and shaders (*HLSL*) programming.

TRAINING

Engineer | 2017 | ESIR | France

Digital Imaging specialty

Special effects. Shaders (*OpenGL*). Ray tracing. Global illumination. Video games.

OBJECTIVE

I am looking for a postdoc in the domain of real-time rendering to work on the visual saliency of 3D scenes.

I would like to find a host company from the video game industry to bring my own knowledge and better understand the challenges and the concrete benefits of the research in this domain.

Ific Goudé

igoude

https://igoude.github.io/

Expertise

C#, C++, OpenGL, Python, Unity3D, Unreal Engine.

Hobbies

Video games. Develop games by participating to jams (Ludum Dare). Record a podcast about video games.

Music (CAM, bass, synthe), original soundtracks for amateur short movies and video games.
